

TROPICAL CYCLONE BULLETIN NR. 4

Typhoon UWAN (FUNG-WONG)

Issued at 11:00 AM, 08 November 2025

Valid for broadcast until the next bulletin at 5:00 PM today.

TYPHOON "UWAN" HAS RAPIDLY INTENSIFIED IN THE LAST 24 HOURS OVER THE PHILIPPINE SEA EAST OF EASTERN VISAYAS.

Location of Center (10:00 AM)

The center of Typhoon UWAN was estimated based on all available data at **680 km East of Borongan City, Eastern Samar** or **760 km East of Catarman, Northern Samar (12.6°N, 131.6°E)**

Intensity

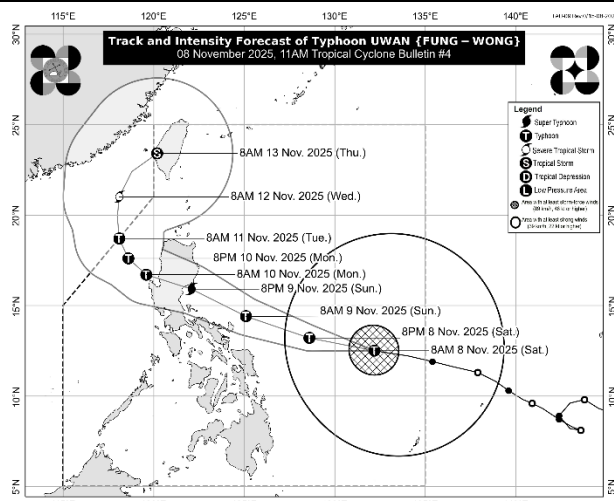

Maximum sustained winds of **140 km/h** near the center, gustiness of up to **170 km/h**, and central pressure of **965 hPa**

Present Movement

Westward at 35 km/h

Extent of Tropical Cyclone Winds

Strong to typhoon-force winds extend outwards up to **780 km** from the center

TRACK AND INTENSITY FORECAST

| Date and Time | Center Position | | | Intensity | | Movement dir. and speed (km/h) |

TROPICAL CYCLONE BULLETIN NR. 4

Typhoon UWAN (FUNG-WONG)

Issued at 11:00 AM, 08 November 2025

Valid for broadcast until the next bulletin at 5:00 PM today.

OTHER HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Refer to Weather Advisory No. 6 issued at 11:00 AM today for the heavy rainfall outlook due to UWAN.

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- **Minor to moderate impacts** from gale-force winds are possible within any of the areas under Wind Signal No. 2.
- **Minimal to minor impacts** from strong winds are possible within any of the areas under Wind Signal No. 1.

The highest Wind Signal that will likely be hoisted throughout its passage is **Wind Signal No. 5**.

Furthermore, **outside the areas under Wind Signals**, UWAN will also bring **occasionally gusty conditions** reaching strong to gale-force strength over the following areas (especially in coastal and upland areas exposed to winds):

- **Today and tomorrow (09 November):** Palawan, Visayas, and Mindanao.
- **Monday (10 November):** Most of Luzon and Visayas.

Coastal Flooding

There is a **high risk of life-threatening and damaging storm surge** with peak heights **exceeding 3.0 m** within the next 48 hours over the low-lying or exposed coastal communities of Batanes, Cagayan, Isabela, Ilocos Norte, Ilocos Sur, La Union, Pangasinan, Aurora, Zambales, Bataan, Pampanga, Bulacan, Metro Manila, Cavite, Batangas, Quezon, Camarines Norte, Camarines Sur, Catanduanes, Albay, Sorsogon, Northern Samar, Eastern Samar, Dinagat Islands, and Siargao and Bucas Grande Islands. **Refer to Storm Surge Warning No. 3 issued at 8:00 AM today for more details.**

TROPICAL CYCLONE BULLETIN NR. 4

Typhoon UWAN (FUNG-WONG)

Issued at 11:00 AM, 08 November 2025

Valid for broadcast until the next bulletin at 5:00 PM today.

HAZARDS AFFECTING COASTAL WATERS

A Gale Warning is in effect over the northern and eastern seaboard of Luzon, the eastern seaboard of Visayas, and the northeastern seaboard of Mindanao. Refer to Gale Warning No. 3A issued at 11:00 AM today.

24-Hour Sea Condition Outlook

Up to very rough, high, or very high seas over the following coastal waters:

- **Up to 14.0 m:** The northern and eastern seaboard of Catanduanes; the northern and eastern seaboard of Camarines Norte and Camarines Sur.
- **Up to 12.0 m:** The eastern seaboard of Albay and Sorsogon; the northern and eastern seaboard of Northern Samar.
- **Up to 8.0 m:** The eastern seaboard of Cagayan and Isabela; the seaboard of Aurora and northern mainland Quezon; the northern and eastern seaboard of Polillo Islands; the northern seaboard of Eastern Samar.
- **Up to 7.0 m:** The eastern seaboard of Eastern Samar; the remaining seaboard of Cagayan including Babuyan Islands.
- **Up to 6.0 m:** The seaboard of Batanes.
- **Up to 5.0 m:** The seaboard of Ilocos Norte, Ilocos Sur, Dinagat Islands, and Siargao and Bucas Grande Islands.
- **Up to 4.5 m:** The seaboard of La Union, Pangasinan, Marinduque, Masbate including Burias and Ticao Islands, and Surigao del Sur; the remaining seaboard of Quezon, Camarines Norte, Camarines Sur, Catanduanes, Albay, Sorsogon, and Northern Samar.
- **Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.**

Up to rough seas over the following coastal waters:

- **Up to 4.0 m:** The seaboard of Zambales, Romblon, Samar, and Biliran; the northern and eastern seaboard of Leyte; the eastern and southern seaboard of Southern Leyte; the eastern seaboard of Davao Oriental.
- **Up to 3.5 m:** The seaboard of Lubang Island; the western seaboard of Bataan; the eastern and southern seaboard of Davao Occidental.
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced of operating ill-equipped vessels.**

Up to moderate to rough seas over the following coastal waters:

- **Up to 2.5 m:** The seaboard of Batangas, Oriental Mindoro, Occidental Mindoro, Calamian Islands, Caluya Islands, Aklan, and Capiz.
- **Up to 2.0 m:** The seaboard of Metro Manila, Northern Mindanao, Zamboanga del Norte, and Sarangani; the remaining seaboard of Central Luzon, CALABARZON, MIMAROPA, and Visayas; the northern and western seaboard of Basilan, Sulu, and Tawi-Tawi.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

TROPICAL CYCLONE BULLETIN NR. 4

Typhoon UWAN (FUNG-WONG)

Issued at 11:00 AM, 08 November 2025

Valid for broadcast until the next bulletin at 5:00 PM today.

TRACK AND INTENSITY OUTLOOK

- **Heavy rainfall, severe winds, and storm surge may still be experienced in localities far from the landfall point and outside the forecast confidence cone. Refer to “Other Hazards affecting Land Areas” for more details. Furthermore, the track may still shift within the limit of the forecast confidence cone.**
- UWAN is forecast to move west northwestward today and tomorrow (9 November) before turning generally more northwestward on Monday (10 November). On the track forecast, the center of the eye of UWAN may **pass close to Catanduanes** tomorrow morning and **make landfall over the southern portion of Isabela or the northern portion of Aurora** tomorrow (09 November) evening or Monday early morning. Furthermore, there is also an increasing possibility of a slight southward shift in the projected path of UWAN, which may result to a direct hit (i.e., eyewall affecting the area without making landfall) or a landfall scenario over Catanduanes.
- After landfall, UWAN will traverse the mountainous terrain of Northern Luzon and emerge over Lingayen Gulf or the coastal waters of Pangasinan or La Union on Monday morning or afternoon.
- UWAN is forecast to rapidly intensify and may reach super typhoon category tonight or tomorrow, although the potential for a much faster intensification is not ruled out due to favorable environment. It may also make landfall at or near its peak lifetime intensity. The interaction with the terrain will cause UWAN to weaken, but it is expected to remain as a typhoon throughout its passage over Northern Luzon and West Philippine Sea.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 5:00 PM today.
