

TROPICAL CYCLONE BULLETIN NR. 13

Super Typhoon UWAN (FUNG-WONG)

Issued at 8:00 PM, 09 November 2025

Valid for broadcast until the next bulletin at 11:00 PM today.

SUPER TYPHOON "UWAN" IS ABOUT TO MAKE LANDFALL OVER THE CENTRAL OR NORTHERN PORTION OF AURORA

Location of Center (7:00 PM)

The center of the eye of Super Typhoon UWAN was estimated based on all available data including those from Baler and Daet Doppler Weather Radars at **125 km Northeast of Infanta, Quezon or 85 km East Southeast of Baler, Aurora (15.6°N, 122.4°E)**

Intensity

Maximum sustained winds of **185 km/h** near the center, gustiness of up to **230 km/h**, and central pressure of **935 hPa**

Present Movement

Northwestward at 30 km/h

Extent of Tropical Cyclone Winds

Strong to typhoon-force winds extend outwards up to **900 km** from the center

TRACK AND INTENSITY FORECAST

Date and Time	Center Position			Intensity		Movement dir. and speed (km/h)
	Lat. (°N)	Lon. (°E)	Location	MSW (km/h)	Cat.	
12-Hour Forecast 5:00 AM 10 November 2025	16.5	119.8	Over the coastal waters of Bolinao, Pangasinan	140	TY	WNW 30

TROPICAL CYCLONE BULLETIN NR. 13

Super Typhoon UWAN (FUNG-WONG)

Issued at 8:00 PM, 09 November 2025

Valid for broadcast until the next bulletin at 11:00 PM today.

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT			
TCWS No.	Luzon	Visayas	Mindanao
5 Wind threat: Typhoon-force winds	<p>The southern portion of Quirino (Nagtipunan), the southeastern portion of Nueva Vizcaya (Alfonso Castañeda, Dupax del Norte, Dupax del Sur), the northeastern portion of Nueva Ecija (Bongabon, Carranglan, Pantabangan), and the northern and central portion of Aurora (San Luis, Baler, Maria Aurora, Dipaculao, Dinalungan, Casiguran)</p> <p>Warning lead time: 12 hours Range of wind speeds: 185 km/h or higher (Beaufort 12) Potential impacts of winds: Extreme threat to life and property</p>	-	-
4 Wind threat: Typhoon-force winds	<p>The southern portion of Isabela (San Agustin, Jones, Echague, Dinapigue, San Guillermo, Cordon, City of Santiago, Ramon, San Isidro, Angadan), the rest of Quirino, the rest of Nueva Vizcaya, the southern portion of Mountain Province (Tadian, Bauko, Sabangan), the southern portion of Ifugao (Tinoc, Asipulo, Lamut, Kiangan, Lagawe, Hingyon, Hungduan), Benguet, the southern portion of Ilocos Sur (Sugpon, Alilem, Cervantes, City of Candon, Santa Lucia, Suyo, Sigay, Galimuyod, Tagudin, Santa Cruz, Salcedo, San Esteban, Santiago), La Union, Pangasinan, the rest of Aurora, the rest of Nueva Ecija, the northernmost portion of Zambales (Santa Cruz), the northeastern portion of Tarlac (Camilin, San Clemente, Paniqui, Gerona, Victoria, Pura, Ramos, Moncada, San Manuel, Anao, La Paz, City of Tarlac, Santa Ignacia), the easternmost portion of Pampanga (Candaba) the eastern portion of Bulacan (Doña Remedios Trinidad, San Miguel, San Ildefonso, Norzagaray, San Rafael), the northern portion of Rizal (Rodriguez), the northern portion of Quezon (Infanta, General Nakar, Real) including Polillo Islands</p> <p>Warning lead time: 12 hours Range of wind speeds: 118 to 184 km/h (Beaufort 12) Potential impacts of winds: Significant to severe threat to life and property</p>	-	-

TROPICAL CYCLONE BULLETIN NR. 13

Super Typhoon UWAN (FUNG-WONG)

Issued at 8:00 PM, 09 November 2025

Valid for broadcast until the next bulletin at 11:00 PM today.

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT			
TCWS No.	Luzon	Visayas	Mindanao
3 Wind threat: Storm-force winds	<p>The southern portion of mainland Cagayan (Tuao, Enrile, Solana, Tuguegarao City, Peñablanca, Iguig, Piat, Amulung, Santo Niño, Alcala, Rizal), the rest of Isabela, the northwestern, central, and southern portions of Apayao (Conner, Kabugao, Calanasan), Abra, Kalinga, the rest of Mountain Province, the rest of Ifugao, Ilocos Norte, the rest of Ilocos Sur, the rest of Zambales, Bataan, the rest of Tarlac, the rest of Pampanga, the rest of Bulacan, Metro Manila, Cavite, Batangas, the rest of Rizal, Laguna, the rest of Quezon, Marinduque, Camarines Norte, Camarines Sur, and Catanduanes</p>		
	<p>Warning lead time: 18 hours Range of wind speeds: 89 to 117 km/h (Beaufort 10 to 11) Potential impacts of winds: Moderate to significant threat to life and property</p>		
2 Wind threat: Gale-force winds	<p>Babuyan Islands, the rest of mainland Cagayan, the rest of Apayao, Occidental Mindoro, Oriental Mindoro, Romblon, Albay, Sorsogon, the northern and western portions of Masbate (City of Masbate, Molo, Aroroy, Balud, Mandaon, Milagros, Baleno, Uson) including Ticao and Burias Islands</p>		
	<p>Warning lead time: 24 hours Range of wind speeds: 62 to 88 km/h (Beaufort 8 to 9) Potential impacts of winds: Minor to moderate threat to life and property</p>		
1 Wind threat: Strong winds	<p>Batanes, the rest of Masbate, and the northern portion of Palawan (Taytay, Dumaran, El Nido, Araceli, Roxas, San Vicente) including Calamian, Cuyo, and Cagayancillo Islands</p>	<p>Northern Samar, Eastern Samar, Samar, Biliran, Leyte, Southern Leyte, Bohol, Cebu, Siquijor, Negros Oriental, Negros Occidental, Guimaras, Iloilo, Capiz, Aklan, and Antique</p>	
	<p>Warning lead time: 36 hours Range of wind speeds: 39 to 61 km/h (Beaufort 6 to 7) Potential impacts of winds: Minimal to minor threat to life and property</p>		

TROPICAL CYCLONE BULLETIN NR. 13

Super Typhoon UWAN (FUNG-WONG)

Issued at 8:00 PM, 09 November 2025

Valid for broadcast until the next bulletin at 11:00 PM today.

OTHER HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Refer to Weather Advisory No. 11 issued at 5:00 PM today for the heavy rainfall outlook due to TC UWAN.

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

- **Extreme impacts** from typhoon-force winds are possible within any of the areas under Wind Signal No. 5.
- **Significant to severe impacts** from typhoon-force winds are possible within any of the areas under Wind Signal No. 4.
- **Moderate to significant impacts** from storm-force winds are possible within any of the areas under Wind Signal No. 3.
- **Minor to moderate impacts** from gale-force winds are possible within any of the areas under Wind Signal No. 2.
- **Minimal to minor impacts** from strong winds are possible within any of the areas under Wind Signal No. 1.

Furthermore, **outside the areas under Wind Signals**, UWAN will also bring **occasionally gusty conditions** reaching strong to gale-force strength over the following areas (especially in coastal and upland areas exposed to winds):

- **Today (09 November):** Palawan, Visayas, and Mindanao.
- **Tomorrow (10 November):** Most of Luzon and Visayas.
- **Tuesday (11 November):** Most of Luzon

Coastal Flooding

There is a **high risk of life-threatening and damaging storm surge** with peak heights **exceeding 3.0 m** within the next 48 hours over the low-lying or exposed coastal communities of Ilocos Region, Cagayan Valley, Central Luzon, Metro Manila, CALABARZON, Bicol Region, most of MIMAROPA, Northern Samar, Eastern Samar, Aklan, Antique, Guimaras, Negros Occidental, Negros Oriental, Dinagat Islands, Siargao and Bucas Grande Islands, and most of Zamboanga Peninsula. Refer to **Storm Surge Warning No. 9 issued at 8:00 PM today for more details.**

TROPICAL CYCLONE BULLETIN NR. 13

Super Typhoon UWAN (FUNG-WONG)

Issued at 8:00 PM, 09 November 2025

Valid for broadcast until the next bulletin at 11:00 PM today.

HAZARDS AFFECTING COASTAL WATERS

A Gale Warning is in effect over the seabards of Luzon, and the eastern and central seabards of Visayas, and the eastern seabards of Mindanao. For more details, refer to Gale Warning No. 8 issued at 5:00 PM today.

24-Hour Sea Condition Outlook

Up to very rough, high, or very high seas over the following coastal waters:

- **Up to 14.0 m:** The seabards of Isabela, Aurora, and Camarines Norte; the northern and eastern seaboard of Polillo Islands.
- **Up to 12.0 m:** The northern and eastern seabards of Camarines Sur and Catanduanes.
- **Up to 10.0 m:** The seabards of La Union and Pangasinan; the eastern seaboard of mainland Cagayan.
- **Up to 8.0 m:** The seabards of Ilocos Norte and Ilocos Sur; the remaining seaboard of Cagayan including Babuyan Islands; the eastern seaboard of northern and central mainland Quezon; the remaining seaboard of Polillo Islands.
- **Up to 7.0 m:** The seabards of Batanes and Zambales; the eastern seabards of Albay and Sorsogon.
- **Up to 5.5 m:** The seaboard of Marinduque; the western seabards of Lubang Islands and Bataan; the northern and eastern seabards of Northern Samar; the northern seaboard of Eastern Samar; the northern and western seabards of mainland Masbate including Burias and Ticao Islands; the remaining seabards of Quezon, Camarines Sur, Albay, and Sorsogon.
- **Up to 4.5 m:** The seabards of Pampanga, Bulacan, Metro Manila, Cavite, Batangas, Oriental Mindoro, Romblon, Calamian Islands, Caluya Islands, Samar, Eastern Samar, Biliran, Leyte, Southern Leyte, Dinagat Island, Surigao del Norte including Siargao and Bucas Grande Islands, and Surigao del Sur; the northern seaboard of Cebu including Bantayan Islands; the eastern seaboard of Davao Oriental; the remaining seabards of Bataan, Occidental Mindoro, Masbate, and Northern Samar.
- **Sea travel is risky for all types or tonnage of vessels. All mariners must remain in port or, if underway, seek shelter or safe harbor as soon as possible until winds and waves subside.**

Up to rough seas over the following coastal waters:

- **Up to 4.0 m:** The seabards of northern Palawan including Cuyo and Cagayancillo Islands, Antique, Aklan, Capiz, Iloilo, and Guimaras; the northern and western seabards of Negros Occidental.
- **Up to 3.5 m:** The seabards of Negros Oriental, Siquijor, Bohol, and Camiguin; the remaining seabards of Cebu.
- **Up to 3.0 m:** The seaboard of Zamboanga del Norte; the western seaboard of Palawan including Kalayaan Islands; the eastern seaboard of Davao del Sur; the remaining seabards of Northern Mindanao.
- **Mariners of small seacrafts, including all types of motorbancas, are advised not to venture out to sea under these conditions, especially if inexperienced of operating ill-equipped vessels.**

Up to moderate to rough seas over the following coastal waters:

- **Up to 2.5 m:** The remaining seaboard of Palawan.
- **Up to 2.0 m:** The seaboard of Sarangani; the western seabards of Sulu and Tawi-Tawi; the remaining seaboard of Davao Region.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

TROPICAL CYCLONE BULLETIN NR. 13

Super Typhoon UWAN (FUNG-WONG)

Issued at 8:00 PM, 09 November 2025

Valid for broadcast until the next bulletin at 11:00 PM today.

TRACK AND INTENSITY OUTLOOK

Do not focus on the center track as it may still shift within the limit of the forecast confidence cone. Heavy rainfall, severe winds, and storm surge may still be experienced far from the landfall point or center track, and even in areas outside the forecast confidence cone. **Always refer to the latest hazard warnings currently in effect (e.g., Wind Signals, Heavy Rainfall Warnings, Storm Surge Warnings) and the information under "Other Hazards affecting Land Areas" of this bulletin for more details.**

- UWAN is forecast to move west northwestward over the next 24 hours. On the track forecast, the center of the eye of UWAN will make **landfall at or near its peak intensity (e.g., as a super typhoon or an upper limit of typhoon) over Aurora (i.e., anywhere along the coastline from Baler to Casiguran)** tonight or tomorrow (10 November) early morning.
- After landfall, UWAN will traverse the mountainous terrain of Northern Luzon and emerge over Lingayen Gulf or the coastal waters of Pangasinan or La Union tomorrow morning. The interaction with the terrain will cause UWAN to weaken significantly, but it is expected to remain as typhoon throughout its passage over Northern Luzon.
- UWAN will begin to turn northwestward to northward from tomorrow to Tuesday (11 November) while remaining at typhoon category. On Wednesday (12 November), UWAN will turn northeastward towards the Taiwan Strait while weakening. It is forecast to make landfall over western Taiwan on Thursday (13 November), then rapidly weaken over the Taiwan landmass before emerging over the waters near Ryukyu Islands as a remnant low or weak tropical depression.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 PM today.
